

EDUCATION

Master of Applied Statistics and Data Science - *University of California - Los Angeles*
September 2025 - Present

- GPA: 4.000
- Relevant Coursework: Probability Modeling, Mathematical Statistics, Modern Statistical Methods, Deep Learning, Data Visualization, Computing & Programming, Data Management, Advanced Statistical Communication

B.S. Applied Mathematics, Minor in Linguistics - *University of California - Davis*
September 2021 - March 2024

- Receiver of The Regents Scholarship and member of the Regents Scholar Society
- GPA: 3.789
- Relevant Coursework: Computational Linguistics, Applied Linear Algebra, Real and Numerical Analysis, Differential Equations

SKILLS

- Programming: Python, R, MATLAB, Java, LaTeX
- Technical Skills: Git, GitHub, GitLab, MySQL, KNIME, NumPy, Matplotlib, Shiny
- Languages: English, Mandarin (fluent), Spanish (proficient)

Professional Experience

Data Analyst and Code Developer Intern - *AvanSight* October 2022 - June 2025

- Led a team of undergraduate interns in developing an RShiny application visualizing statistical power and sample size relationships
- Streamlined clinical trial data processing workflows for FDA-compliant tables and figures
- Developed analytical pipelines in R, SAS, and KNIME to improve statistical reporting and workflow efficiency
- Collaborated across teams to validate outputs and compare results across multiple platforms
- Managed project coordination, application functionality, and data visualization implementation

Projects & Research

Machine Learning Portfolio Optimization Project — UCLA January 2026 – Mar 2026

- Developed a machine learning framework for predicting 21-day asset returns and optimizing multi-asset portfolios using Mean Absolute Deviation (MAD) optimization
- Implemented and compared Random Forest, XGBoost, and LSTM models on financial time-series data spanning equities, foreign exchange, commodities, and cryptocurrencies
- Engineered features from market indicators and evaluated models using RMSE, MAE, and directional accuracy under rolling-window validation
- Contributed to data preprocessing, results interpretation, manuscript writing, and presentation development for a collaborative research project

Research on Probabilistic Methods - UC Davis March 2024 - June 2024

- Researched probabilistic methods and their applications in mathematical modeling within a three-person team
- Co-authored a 20-page research paper analyzing probabilistic models and real-world implications
- Presented findings using statistical visualizations and technical explanations

Math & Science Teaching Intern - Robert E. Willett Elementary January 2023 - March 2023

- Designed and taught interactive STEM lessons for elementary students
- Adapted lesson plans for diverse learning styles and tracked student progress
